

# AC Group Control

Used in applications where it is necessary to operate more than one 110v system simultaneously from one control. Hook-ups from manual override of individual systems are also built-in to accommodate different applications of groups, subgroups, and individual operation.

Voltage	110v AC
4 Units	8 max Amps (10 x 10 x 4 beige box)
8 Units	15 max Amps (12 x 12 x 4 beige box)
12 Units	25 max Amps (18 x 18 x 6 gray box)
