

The Combio™ 915

Key Features

- External RF controller
- Compact design
- Simple Programming
- Programmable for groups and sub-groups
- Simple Installation

The new **Combio** from Elero was designed for simple installation and programming in a sleek compact size. The **Combio** can be hidden in almost any installation. The **Combio** was designed to provide remote control for any Elero motor with mechanical limit switches. It includes the ability to provide an intermediate stop in addition to open and close limits.

The **Combio** can be used in combination with a number of control devices. The **MonoTel** is a simple single-channel decorative transmitter that can be programmed for simple up and down or open and close functions. The **VarioTel**, can be used for up to five individual or groups of sun protection systems.

There are two wireless wall switches available for use with the **Combio**. The **Memo-Tec** is a simple single-channel wall switch that requires no wiring. The **Astro-Tec**, in addition to being a simple single-channel wall switch, also includes a multi-function timer and a unique astro program. The astro program allows you to set open and close times based on sunrise and sunset.

The **Aero 915** is a simple single-channel wireless sun and wind sensor. The **LumeroTel** is a simple single channel transmitter to be used in conjunction with the **Aero 915**.

Control Devices

Where Quality Counts

Elero offers a full line of control devices that are shown below. All of these devices can be used in conjunction with the new Combio™ from Elero. These controls are designed to be used exclusively at 915 MHz.

MonoTel

A single-channel decorative transmitter with operating functions only

VarioTel

A 5-channel transmitter with programming and control capability for up to five systems individually or as a group

Memo-Tec

A single-channel decorative wireless wall switch

Astro-Tec

A single-channel decorative wireless wall switch with a unique built-in timer

Aero 915 and LumeroTel

The Aero 915 is a single-channel wireless sun and wind sensor. The LumeroTel is a single-channel decorative transmitter that is used in conjunction with the Aero 915.
