

**PRODUCT BULLETIN
DISENGAGABLE LIMIT SWITCHES**

Time saver feature for assembly and installation!

**KEY FEATURES**

- Integral disconnect
- Instantly adjustable from "on" to "off"
- Motor without limits when in "off" position
- Roll-up turns can instantly be set within limit range
- Protective cover eliminates risk of accidental use
- Reduces assembly and installation time, eliminates fabric/shutter attachment problems

APPLICATION

All Elero standard Type 11 motors are equipped with disengagable limit switches. If an application is not within the usable limit switch range when installed, the limit switch assembly can easily be disengaged with the movement of a lever and the motor can be run without limit switches to align the application to the limit switch range. It is no longer necessary to detach the shutter from the tube to bring it back in the limit range. This is of great convenience when installing especially heavy 200 to 500 pound applications which are typical for a motor of this size.

HOW TO ORDER

Disengagable limits are a standard feature on the Elero Type 11 motors.

11/4	Motor	Part Number	31.231.0002
11/6	Motor	Part Number	31.241.0001
11/8/14	Motor	Part Number	31.251.0002
