

Exterior Key Switch

Key Features

- Interior or exterior use
- Heavy duty industrial contacts
- SPDT momentary contacts
- Tamper-proof case
- Weather resistant enclosure
- Easy to install

The Elero heavy duty key switch has found extensive use in exterior applications, but is also suitable for interior applications in which maximum security is desired. The replaceable industrial grade contacts are rated to 10 amps at 600 volts AC. This unit was designed for protection from rain, splashing water and hose directed water and carries a NEMA-4 rating. The easy to install key assembly has ample space for wiring between the case and key assembly. The cast metal enclosure includes a threaded opening for installation of conduit. The external key mechanism is plated for additional corrosion resistance. An added security feature of the switch is the tamper-proof construction which prevents opening of the enclosure without inserting a key. Each switch is standard with 3 keys. Duplicate keys are available for a minimal charge.
